SKILLS

- HTML5, CSS3, SCSS
- Tailwind, Bootstrap, Material UI
- JavaScript (ES6+), TypeScript
- Angular, RxJS ngRx
- Angular Material, PrimeNG
- Form Builder & Reactive Forms
- REST API Integration
- Git, GitHub, npm, Figma UI (Basics)
- Responsive Design & UX

LANGUAGES

- English (Good)
- Arabic: (Native)

EDUCATION

Bachelor in information systems
2019 - 2023

GPA: 3.6

OBJECTIVES

I'm Front-End Developer specialized in building scalable and high-performance web applications using Angular and TypeScript. Experienced in reusable components, state management (NgRx), and integrating REST APIs. Focused on writing clean, maintainable code and delivering pixel-perfect, responsive UI with strong attention to user experience. Seeking an opportunity to contribute to a professional development team and grow my technical capabilities.

PROJECTS

Task Management System

2024 - 2025

Technologies: HTML5, CSS3, JavaScript (ES6+), Bootstrap 5 (RTL), Font Awesome, Axios, LocalStorage API, Git

- Built role-based access control (Admin, User, Viewer) with session management
- Created responsive RTL UI with task filtering, pagination, and status updates
- Implemented task assignment with comments, file attachments, and notifications
- Developed user management and file library modules

Market (E-Commerce SPA) — Frontend Developer

(Angular)

2024 - 2025

Technologies: Angular 16-20, TypeScript, RxJS, HTML5, SCSS, ngx-translate, Bootstrap, FontAwesome, FakeStoreAPI, LocalStorage, GitHub Pages

- Key Features:
- Developed responsive SPA with Admin and User role-based views
- Implemented shopping cart with quantity management and real-time totals
- Created client-side authentication with route guards and protected routes
- Added internationalization support (ngx-translate) and production deployment on GitHub Pages
- Link:** <https://salemabdelrahman.github.io/Market/>

Alpha Flooring - Conversion Landing Page

2024 - 2025

Technologies: HTML5, CSS3, Vanilla JavaScript, Google Apps Script, Google Tag Manager, LocalStorage, Intersection Observer

- Project Overview: Built a high-converting landing page designed to drive inbound leads with video hero section, trust elements, and responsive reviews carousel.
- Implemented lead capture form with validation posting directly to Google Sheets via serverless Apps Script
- Added dark/light theme toggle with persisted preferences using LocalStorage

PROFESSIONAL EXPERIENCE

Freelance UI Developer

2021 - 2025

- Developed responsive Angular applications with REST API integrations and role-based access control
- Built conversion-focused landing pages with lead capture and analytics tracking
- Implemented task management systems with CRUD operations and real-time updates
- Created reusable UI components following best practices and scalable architecture
- Collaborated with clients to deliver projects on time and meet business requirements
